 Transmission Power: 16~20dBm
 Ringing tone: 12 selectable tones
 Dimension (H,W,D): 127mmx95mmx37mm
 Weight: 150g

Vu-Com

**WIRELESS COLOUR VIDEO
 DOOR PHONE**

Vu-Com allows you to screen all visitors from within the safety of your home or office. You need never open your front door to unknown callers again. You can see, hear and talk to them on a mobile handset from almost anywhere in or around* your premises. Then when you're completely happy that the caller is someone you want to see you can either answer the door yourself – or use the electronic release button on the handset which unlocks** the door automatically and allows them in.

* Within radio range

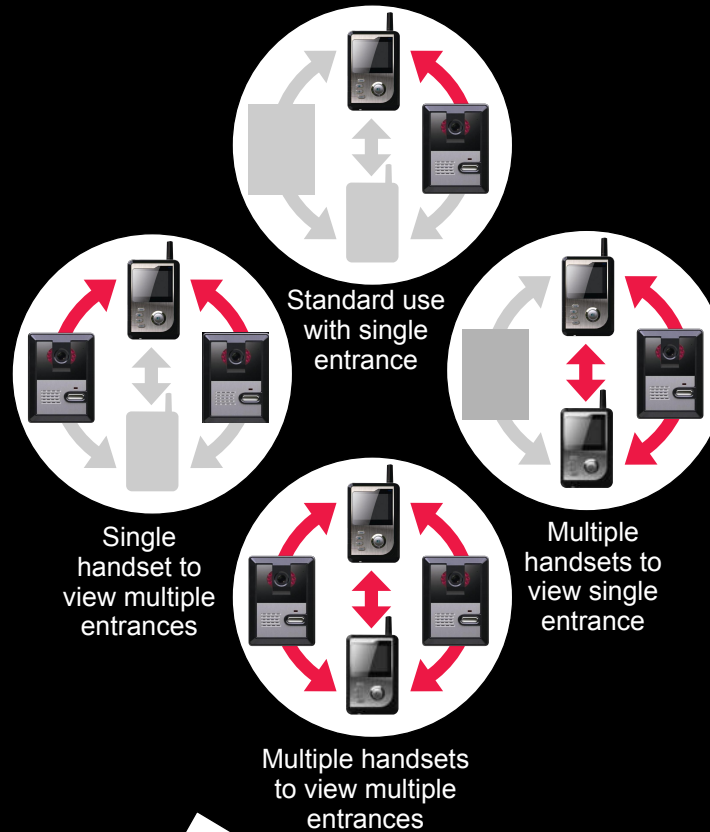

** Requires electric door lock fitted, NOT supplied with kit

Vu-Com is very easy to use and just as easy to install because it's wireless! Therefore there are no unsightly interconnecting wires or cables that require routing through your home – or office.

Quality and reliability from the innovators in wireless security and safety equipment.

GM Techtronics have many years experience in supplying specialist security products for both home and business – and have substantial connections with quality, reliable manufactures in both Europe and the Far East – as well as offering in house technical support and product training.

- Portable wireless handset
- Handset to handset audio intercom.
- Infra red camera for night vision.
- Free field range 300 metres.
- Identify and screen callers.
- Remotely unlock doors.
- Surveillance mode.
- Simple installation.
- Expandable to 2 handsets and 2 call stations.

Each handset can monitor and operate up to two entrances – and if two handsets are used on the same system they can also page one another with the linked audio facility
